

VIPER FIGHTER

The viper is the only fighter that you will be flying. At present, there are only 160 vipers aboard. Normally, you would have been assigned your own but circumstances do not permit this.

Vipers carry two laser cannons as their only weapon system. Although smaller than a Cylon raider, they are equally armed, and more maneuverable. They have 3 turbo thrusters instead of 2, and are equipped with an escape pod for emergencies. The escape contains a survival pack with enough supplies for 2 centuries.

PARTICULARS

Weight.....20,000 laxars
Length.....30 metrons
Width.....18 metrons
Speed.....LX20
Propulsion.....3 turbo thrusters
