

The Bath & Laundry are located between Cabin 2 & 3. The Automatic Laundry, a storage cabinet and an Electronic Lavatory are located in the outer Laundry Area. Behind a curtition in the Bath is the Electronic Shower, storage and an Emergency Exit to Tripod Landing Gear No. 1. The Bath & Laundry also provide storage space for a Garment Fabricator and a Hair Care Unit.

AUTOMATIC LAUNDRY

The Automatic Laundry can be used in its storage area or be transported to any location for use. To operate the Laundry simply raise the lid and place soiled garments loosely in the compartment. Close the lid and activate the unit. The machine will hum into action with a flashing of lights. Moments later the machine will stop. The clothes can now be removed, clean, folded and wrapped in polyethylene.

GARMENT FABRICATOR

The Garment Fabricator is a portable unit used to replace worn-out or out-grown clothing. After taking measurements for the new clothing the sizes and style code are entered on the control panel at the front of the unit. New fabric is then feed into an opening at the back. The machine will start to work and in just a few minutes the new garment will drop out of a chute in the front, ready to wear.
