

ELECTRONIC LAVATORY & SHOWER

To conserve water, for drinking, the Spaceships Lavatory & Shower are both completely electronic. To use either the Lavatory or the Shower the "on" button is pressed. Ten warning "beeps" will sound. The ultra-violet light, used for cleaning can be harmful to eyes, so this allows the astronaut time to close their eyes. One long "beep" will then be heard for ten seconds. When the sound stops all bacteria and dirt has been disintegrated and may be wiped off. When water is available on the new planet, and dirt is excessive, a portable bath tub may be used.

HAIR CARE UNIT

For cleaning, cutting and styling hair, a Hair Care Unit is available. A styling chart gives codes for new styles or cuts. The "hat-like" unit is placed on the head and the code is entered on the hand-held remote control. The cycle is complete in just a few seconds.
