## HIGHLIGHTS OF THE JOURNEY OF MOONBASE ALPHA

From the Records Division of the Alpha Data Section – 3047 days since leaving Earth orbit.

September 13, 1999    Massive thermonuclear explosion rips the Moon from Earth orbit.

Days Since Leaving  
Earth Orbit

6                      Jack Crawford dies from reactor malfunction. Survived by wife Cynthia. She is 4 months pregnant.

21-24                Alpha encounters the planet Terra Nova. Helena Russell's husband Lee attempts to warn the Alphans away from the anti-matter planet.

30-31                Alpha is drawn into a black sun.

43-45                A space probe from the planet Triton attempts to destroy the Moon while on its way to destroy the Earth.

54-59                Caldorian spacecraft crash lands on the Moon. While the Alphans help to repair the sleepership, Commissioner Simmonds plots to force his way aboard.

64-70                A rift in the fabric of space hurls the Moon into another time dimension where the Alphans encounter their future selves.

77-78                Commander Koenig's soul is kidnapped by Raan of the planet Zenno.

90-95                The Guardian of Piri lures the Alphans toward a living death.

116-118             Anton Zoref is possessed by an energy-consuming life form.

122-128             Jackie Crawford is born. Both young Jackie (who suddenly develops into a five-year old) and his mother are transformed into two aliens who plan to hide their outlaw group within the bodies of the Alphans.

140-147             Natives of the planet Ariel send a fleet of space probes to Alpha. The probes create Earth-like conditions on the lunar surface.

153-155             Alpha encounters the malfunctioning Voyager space probe.

162-164             Alpha on a collision course with the giant planet Astheria.

179-184             The Alphans meet the survivors of the Uranus Probe.
